ABOUT US

Constantly researching and innovating...

Finetech Research and Innovation Corporation was established in 1999 and has been engaged in the gas and fluid filtration used in laboratories and the medical fields for many years. We concentrate on the researching, developing, and manufacturing of lab filters such as syringe filters, 50mm air/vent filters, pipette filters, gas analyzer filters, and customized filters.

In 2004, we were the first manufacturer of transducer protectors used in dialysis. In 2017, sales of transducer protectors had reached to over 30 million pieces/year. Our high quality and ISO 13485 certified transducer protectors has kept our customers satisfied for more than 14 years.

Manufactured in 2010, our syringe filter is designed to provide efficient filtration of aqueous and organic solutions. It can be used to remove particles from a sample prior to analysis by HPLC, for the filtration of gases, and for the removal of bacteria from a sample. Syringe filters are widely used in environmental, pharmaceutical, biotechnology, and agricultural testing laboratories.

In 2015, Finetech designed and manufactured caps, septa, and samples vials used in chromatography. We supply HPLC consumables to the global chromatography community in over 36 countries. We constantly innovate with releases of new lab consumables and medical devices every year. Some of the other products we manufacture are sterile syringe filter, membrane filters, centrifuge tube, glass microfiber filters, vacuum filtration system, and QuEChERS. To find out more, please visit our website "www.finetech-filters.com".

History

- 2024 Developed TC Petri Dish(Award of Government Support Plan)
- 2022 Developed Sanitary Pad
- 2021 Developed Racked Filters Tips, PCR Supplies, Cell Culture Series
- 2020 Produced Disposable Medical Masks
- 2019 Produced Bottle Top Filter Unit
- 2018 Researched and developed QuEChERS
- 2017 Produced 15mL & 50mL centrifuge tubes (sterile & non-sterile)
- 2016 New product launched – sterile filtration cup
- 2015 Achieved ISO 9001. Received award of Conventional Industry Technology Development for Medical grade septa
- 2014 Started producing sterile syringe filters
- 2012 Produced the 1st 50mm air vent filters
- 2010 Produced the 1st syringe filters manufactured in a cleanroom
- 2008 Developed transducer protectors. 1st manufacturer in Asia
- 2005 Awarded the Medical Device award from Taiwan Government
- 1999 Finetech Research and Innovation Corporation established

Taiwan Factory

China Office

Vietnam Factory

Product Timeline

1999

Finetech Research and Innovation Corporation established.

2008

Developed autoclavable transducer protector.

2012

Produced the first 50mm air/vent filters in Taiwan.

2015

Started production of vials for chromatography and environmental analysis.

2016

New product launched – sterile filtration cup.

2018

Researched and developed QuEChERS kit

2020

Disposable Medical Masks

2022

Developed Sanitary Pad

2004

Developed transducer protectors. Was the first manufacturer in Asia.

2010

Produced the first syringe filters manufactured in a cleanroom in Taiwan.(PureTech)

2014

Started producing sterile syringe filters.

2015

Vacuum Pump & Vacuum Filtration System (Stainless Steel manifold)

2017

Produced 15mL & 50mL centrifuge tubes (sterile & non-sterile)

2019

Bottle Top Filter Unit
100ml Funnel Filter

2021

Rack Filter Tips & PCR Supplies
Cell Culture Series
Petri Dish

2023

Developed TC Petri Dish (Award of Government Support Plan)

A. Finetech® Sterile Syringe filters

13mm

- Housing material: Medical grade polypropylene
- Pore Size: 0.22µm, 0.45µm
- Outside diameter: 17mm
- Membrane diameter: 13mm
- High flow rate and throughput
- Low hold-up volume (less than 25µL)
- Low extractables
- Individual sterile blister pack

33mm

- Housing material: Medical grade polypropylene
- Pore Size: 0.22µm, 0.45µm
- Outside diameter: 33mm
- Membrane diameter: 25mm
- High flow rate and throughput
- Low hold-up volume (less than 100µL)
- Low extractables
- Individual sterile blister pack

❖ Ordering Information

① Membrane		② Diameter	③ Sterile	④ Pore size	⑤ Membrane characteristics
PVDF PTFE Nylon MCE	CA PES RC GF	017=13mm 033=33mm	N (Non-Sterile) S (EO/GAMMA)	022=0.22µm 045=0.45µm	I = hydrophilic O = hydrophobic

B. Finetech® Bottle Top Filters

❖ Features

- Manufactured from virgin Polystyrene.
- Tissue culture treated surface to aid in cell attachment.
- Walls have even thickness and no distortion.
- Wide design increases stability when stacked.
- Quick opening cap.
- Angled bottlenecks, convenient for pipettes and cell scraping.
- Frosted write-on spot.
- Clear graduation scale.
- Stack-able to save space.
- Gamma ray sterilization.
- DNase/RNase-free and non-pyrogenic.
- Available with sealed or vented cap.

C. Finetech® Cell Culture Plates

❖ Features

- Available in 6, 12, 24, 48, 96 well plates.
- Manufactured from virgin Polystyrene.
- Tissue culture treated surface to aid in cell attachment.
- Tight fitting cover prevents contamination and loss by evaporation.
- One-way cover reduces errors.
- Alphanumeric labels for easy organization.
- Stack-able to save space.
- E-Beam sterilization.
- DNase/RNase-free and non-pyrogenic.

❖ Ordering Information

Model No.	Number of Wells	Bottom	Cell Growth Area	Recommended Volume	Sterile	Packaging

F. Finetech[®] Erlenmeyer Shake Flasks

❖ Features

- Polyethylene terephthalate glycol-modified (PETG) construction: provides excellent optical clarity and mechanical strength
- Sizes range from 125 to 1000ml
- Molded-in graduations for accuracy ($\pm 5\%$)
- Vent cap for continuous gas exchange while ensuring sterility and preventing leakage
- Individually packaged
- RNase-/DNase-free
- Nonpyrogenic

G. Finetech® Centrifuge Tubes

15/50ml Centrifuge Tubes

❖ Features

- These conical-bottom tubes are made of ultra-clear polypropylene.
- Cap Material: HDPE
- Sterility: EO or Gamma
- Leakproof
- Black printed graduations with large marking strip for easy labeling.
- Easy single-hand operation.
- Clear graduations provides easy volume reference.
- Available in non-sterile.

❖ Specification

	15mL	50mL
Bottom Graduation Range	0.1 ~ 1 mL	-
Bottom Graduation Interval	0.1 mL	-
Graduation Range	1.5 ~ 14.5 mL	5 ~ 50 mL
Graduation Interval	0.5 mL	2.5 mL
Freezable	-80°C	-80°C
Maximum RCF	21,800 xg	14,000 xg
Maximum RPM	15,000 rpm	12,000 rpm

❖ Ordering Information

Model No.	Description	Packaging
ST-tube15	15 mL centrifuge tubes, Nonsterile	25pcs/pk, 500pcs/ctn
ST-tube50	50 mL centrifuge tubes, Nonsterile	25pcs/pk, 500pcs/ctn
ST-tube15-EO	15 mL centrifuge tubes, EO sterile	25pcs/pk, 500pcs/ctn
ST-tube50-EO	50 mL centrifuge tubes, EO sterile	25pcs/pk, 500pcs/ctn
ST-tube15-GA	15 mL centrifuge tubes, Gamma sterile	25pcs/pk, 500pcs/ctn
ST-tube50-GA	50 mL centrifuge tubes, Gamma sterile	25pcs/pk, 500pcs/ctn

1

Easy to read and accurate. Black printed-on and clear-molded dual graduations (15ml) provides contrast for samples of any color.

2

Molded graduations on the conical bottom for the 15ml. Providing precise measurements of small volumes.

3

Flat caps for easy labelling and deeper plug seals for better leak resistance.

4

Large and easy-to-write-on surface for clear labeling of samples. Frosted surface (15ml) allows viewing of the sample.

5

Caps: HDPE
TUBE: PP

- Fully recyclable and environmentally-friendly
- Made of virgin medical grade PP for the highest quality and lowest extractables.

- Rated at maximum RCF of 21,800 xg (15ml) and 14,000 xg (50ml).
- Freezable to -80C.
- DNase/RNase free and non-pyrogenic.

H. Finetech[®] Pipette Filter Tips

❖ Features

- Made of highly transparent PP material.
- Non-pyrogenic and with low adhesion.
- Compatible with Finetech, Eppendorf, Brand, Gilson, Thermo/Finn, and other brands pipette.
- High quality tip with smooth inner walls reduces sample residual.
- Racked sterile filter tips also available.
- Free of DNase, RNase, DNA, Endotoxin.

I. Finetech® Sterile Serological Pipette

- Capacity: 1mL-50mL
- Sterilization: E-Beam
- Packaging: Individually packed

❖ Features

- made of imported general purpose polystyrene (GPPS) in clean room environment.
- Available in six capacity: 1.0ml, 2.0ml, 5.0ml, 10.0ml, 25.0ml, 50.0ml. Graduations are calibrated within $\pm 2\%$.
- 1.0ml, 2.0ml, 5.0ml pipettes are shaped by stretching method.
- 5.0ml, 10.0ml, 25.0ml, 50.0ml pipettes tips are welded to the tube by supersonic wave.
- Smooth and clean without draw lines.
- Different colors correspond to different specification, making it easy to distinguish.
- Maximum reduction of liquid adhesion to the tube inner wall, which improve the sampling accuracy.
- Excellent double-side graduation design ideally meet with the demand for liquid adding or reducing.
- Clear and simple graduation, as well as the negative one for extra volume, makes the liquid drawing and reading easier.
- All serological pipettes are assembled with high quality filters.
- Available sterile or non-sterile .
- Non-pyrogenic and DNase/RNase-free.

J. Finetech® Cryotubes

Finetech cryotubes are made of medical grade PP material and are the ideal lab consumable for biological sample storage. In the gas situation of liquid nitrogen, it can withstand temperature as low as -196°C. Silicone gel O-ring in the cap ensures no leakage, even in the standard lowest storing temperature, which will guarantee the sample's safety. Different inserted color top will help with identification. White writing area and clear graduation make the mark and volume calibration more convenient. Maximum RCF:17,000xg

- External screw cap can reduce the contamination probability during sample treatment.
- Cryotube with internal screw cap is for freezing samples in gas situation of liquid nitrogen.
- Large white writing area allows easy marking.
- Round bottom design is good for pouring liquids out with little residual.

K. Finetech® PCR Supplies

K 1 PCR Single Tubes

Finetech® PCR tubes are easy to open and provide tight sealing to prevent evaporation. With their thin, consistent wall thickness and smooth wall surface, they also ensure efficient heat transfer to the sample, speeding up your PCR.

Unit:mm						
A	B	C	D	E	F	G
21.70	13.12	φ6.95	22.91	20.34	17.5°	8.31

❖ Features

- ▶ Thin wall: allows precise thermal transfer.
- ▶ Easy labeling
- ▶ Low Evaporation: insertion cap ensures a tight fit to reduce evaporation.
- ▶ Autoclavable
- ▶ No DNase, RNase, heat source and inhibitor pollution.

❖ Ordering Information

K 2 PCR 8-Strip Tubes

❖ Features

- ▶ Thin wall: allows precise thermal transfer.
- ▶ Easy labeling
- ▶ Low Evaporation: insertion cap ensures a tight fit to reduce evaporation.
- ▶ Attached caps help avoid cross-contamination between different tubes
- ▶ Autoclavable
- ▶ No DNase, RNase, heat source and inhibitor pollution.

PCR-P01-S-A	0.1ml, 96 well PCR plate, Semi-Skirt, Clear (for ABI)	10pcs/bag, 50pcs/cn
PCR-P02-S-A	0.2ml, 96 well PCR plate, Semi-Skirt, Clear (for ABI)	10pcs/bag, 50pcs/cn
PCR-F	Pressure sensitive adhesive PE sealing film, -200~1200, transparent, 132*80mm(for Finetech)	100 pcs/box , with 1 pcs scratch card

FINETECH RESEARCH & INNOVATION CORP.

website

Company Profile

- Since 1999, Finetech Research and Innovation Corporation has been manufacturing and supplying laboratory consumables to various types of labs all over the world. With exports to over 40 countries, Finetech has become one of the leading provider for environmental, pharmaceutical, biological, and other testing laboratories
- Finetech began with the research & development and manufacturing of syringe filters and other filtration products. In keeping with our core principle of innovation, Finetech has expanded their product line to include lab equipment and other supplies to meet the needs of their customers.
- Finetech follows the principles of quality over quantity and good services for all. The importance of quality can be seen in the use of quality imported materials and equipment, the use of a cleanroom, and the strict quality control standards.
